IDEA

The idea is, that you can easy decide how much features do you would like for rthe decision tree and then the decisions tree will display, so you can decide in the future, which class your observation is

Input

In the Slider you can decide, how much features you would like, it counts from the first feature in the iris data set until the fourth.

Output

The output is a fancy decision tree

Example output

setosa
.33 .33 .33
100%

yes · **Petal.Length < 2.5** · no

versicolor
.00 .50 .50
67%

Petal.Width < 1.8

setosa
1.00 .00 .00
33%

versicolor
.00 .91 .09
36%

virginica
.00 .02 .98
31%
